The Coin Factory

With fresh and new ideas Helvetic Mint offers expert advice and creative implementation on a wide platform for sophisticated and market orientated products.

Products are characterized through quality and an excellent value for money. We accompany you from the first draft through the whole production including the quality control and the packaging which is all done by the most modern and continuously updated technology.

We offer the complete service of conception, design, engraving, embossing, minting and packaging.

We consider environment not just a word but a programme. Our complete production undergoes constant check-ups and together with our suppliers we continuously work out new ways. The responsibility for each individual and for our society is a must for us.

As a customer you are more than just our partner. Our constant thriving is for the development of broad and market orientated solutions and to turn these into new innovative products for you.

Our standard orientates itself on the perfect effort according to your demands.

Ideas & design

Unique ideas are the basis of every good product – we have a lot of unique ideas and are happy to work them out for you. We develop everything from concepts up to series for more than one and, of course, individual packaging along with it.

Or, if you prefer, bring us your ideas and we do the graphical implementation.

We believe that design is creativity which is matched to the product and the expectations of the consumers. We are more than familiar with the necessary technical requirements of our products. So why not let our professionals implement your ideas. Our know-how can save your money, too.

Precious metals

We are also able to get the necessary precious metals for your products. The location of Switzerland and its privileged purchasing structure enables us to pass on the pricing advantages directly to our customers and therefore we can offer a very good value for money.

Gold coins

Gold and all that has to do with it has always had to be treated with caution and, of course, trust is a major subject. According to your demands we produce all sizes and weights in different and controlled alloys. Ripple rims or individual rim inscriptions are also part of our business activities.

Silver coins

Coins, medals or bars, paginated or polished, whatever you wish, we can find the matching solution for you. We guarantee that the alloys are checked and correctly observed by us through our protected previous metals insignia. If you plan a small edition or a large edition, you will always profit from our all-around and on-time services.

Partial gilding

By partial gilding, which is the most common way of partial electroplating in the coin business, relevant parts of the theme can be accentuated in a very classy way.

Ultra High relief

Coin and medal design done in the ultra high relief way is certainly the masterpiece in the field of coining and embossing. Very few companies around the world are still capable of using this production technology. Through various production processes in the tool technology we are able to offer you these exclusive designs.

Printing

Our in-house Printing Department allows unlimited creativity in colour-coordination directly onto the coins and medals.

Enamelling

The newest way of arranging any design you wish on coins is possible through our high definition minting process. The surfaces can be sealed either soft or hard according to your requirements. In any case the sealing will be clear and transparent and refines the appearance.

Stone inlays

Combining metal and stones is one of the more interesting ways of designing coins or medals. Here the possibilities are nearly endless and we have the respective professionals for these jobs.

Crystals and gemstones

Surely the noblest way of ornamenting a coin or a medal. Through a wide variety of suppliers the use of stones in different qualities is possible. Even the use of so called "brand stones" is doable without a problem.

Licenses

Our service to you also includes getting all necessary licenses for the distribution of your coins.

Our global network has numerous contacts in a large number of countries to fulfil your requirements for licensing.

Packaging

We can package your products into units given to us by you or design some only for you. The necessary materials will be obtained through us, we organise the production and take care of the logistics all in one hand. We can offer standard possibilities which will be tailored to your demands or we can offer exclusive and individual solutions just for you.
